R. BOLLING AGAIN ADVOCATES IN TRODUCTION OF METRES.

Repairs to the Water Works During the Past Year-Capacity of the Pumping Apparatus Waste of Water.

Mr. Charles E. Bolling, Superintendent of the Water Works, in his report to the and City Council in regard to the ne by his department during the of gives a detailed statement as indition of the plant, the work he expenses incurred, etc. He disshows that during the past nine ince he has been in charge of the ks, a distinct and steady progbeen made. He takes the ground for the money invested since the ishment of the works in 1830 the city has received full returns, either in the annual revenues derived from it or in the value of the property which has

Mr. Bolling lays great stress upon the advantage which would be derived from a general introduction of water-metres and the saving that would emanate from it to water-takers. However, he admits the fact that a majority of the members of the City Council are not disposed to carry out this suggestion, and he makes, therefore, propositions as to the next best thing to be done.

The following is an extract from his

The following is an extract from his report in addition to what has been published in yesterday's Times:

The race-ways of the water works are in fair condition, with the exception of a short section of the canal banks just west of the five-mile lock. The repairs along the strength of the section of the canal banks just west of the five-mile lock. The repairs along of the five-mile lock. The repairs along this section have been constant, and cost during the year \$1,308.45. The bank at this point could be made perfectly secure and safe by an outlay of \$3,500, and I trust the amount will be appropriated this year to snake the bank secure and relieve us of this heavy annual tax. Repairs are also needed to the guard band at Bosher's Dam, on the south side of the river, and the wing walls to the dam on the north side. I regard these repairs as necessary for the preservation of the dam. A large portion of the canal channel was dredged last year, at a cost of \$1,511.38 to the city. The same amount was paid by the Chesapeake and Ohio hallway Company for this improvement. The head walls and gates are all in good order.

REPAIRS TO THE MACHINERY.

The damage to the machinery in the two pump-houses during last winter from the ice was not great, but entailed some repairs. The most important improvement made was the introduction of a new style of valve in the new pumps. The old brass cornish valves were worn out and had to be renewed. The cost of these valves was \$2,700. I had put in a new cast-fron valve and seat, rubber faced, in all the pumps, at a cost of \$1,620, one great improvement being the cheapness in repairs to this valve, as the principal warring part is the rubber face, which can be replaced at a cost of \$10, whereas the renewing of the old valves cost \$100 in each case. The efficiency of the pumps was greatly increased by this change, saving a speed in revolution of about 20 per cent. New plungers and plungerdamage to the machinery in the cent. New plungers and plunger-were put in the steam pump, which much needed. The pumping ma-ry at both the old and new houses, salidings and grounds, are all in very condition, and present a better ap-ance than ever before.

SAVINGS FROM WATER METRES.

g the past year 250 water metre n use in this city, an increase of five over the number of the pre-ear, All the metres set during last year. All the metres set during last have been purchased at the request one of the water taker, and the re-demonstrate clearly that the water showed wisdom in making the pur-and has saved water and expense. Impossible to fix a rate for water ble to all cases, and the only fair charge for water is by measure-Among the 239 premises examined the year which contain metres, are residences, manufactories, and of charge, as fixed by ordinance water bills of citizens belonging to working class, who introduced metthe working class, who introduced metres into their houses during the past year, who was asving to them of fifty per cent. and upon inquiry I have learned from them individually that they have in no way stinted themselves, but have used water abundantly in their family use and miso for home sprinkling. The total saving in the 20 cases examined shows an average of 50 per cent. There are only five cases in the whole list showing a higher ball by metre than by ordinance rate, and bill by metre than by ordinance rate, and this has been caused by leaks or negligence in leaving the fixtures running. There have been only a few complaints, and invariably have we been able to satisfy the consumer as to the cause. I am safe in saying nibety-eight per cent. of those having metres advocate their general use. One leaky fixture for one month's bill arouses the consumer, and from that time, by his vigilance, he is rewarded with a small bill.

THE WASTE OF WATER, The average daily consumption of water during the past year was nearly the same as during the previous year, 13,521,-256 gallons, and placing the population of this city at 90,000, this would be qual to 150 gallons per capita. A com-carlson with Atlanta, Ga., a city of bout the same size as Richmond, but with a metre to every tap, shows that in the former they pumped during the past year daily less than 3,000,000 gallons. In 1885 previous to the putting in of metres, has previous to the putting in of metres, the daily pumpage at Atlanta, with 1,580 taps, was nearly 6,00,000 gallons, double what it was in 1892, with 4,500 taps. The reports from Atlanta show that all residents in that city are abundantly supplied with an average of 21 gallons per day and per capita, while we are suffering in this city for want of pressure, and with a community of 150 rallons per head. with a comsumption of 150 gallons per head.
I do not know how to make the illustra-I do not know how to make the illustra-tion more forcible than as stated. We are wasting over 9,000,000 gallons of water each day, of no use or benefit to any one, but subjecting our citizens to the cost of furnishing it. I am fully aware that metres are not the panacea for every thing, but they would meet our requirements for some time to come. Whenever the Lee district, which has recently been taken into the corporate limits, begins to build up we will have

becently been taken into the corporate limits, begins to build up we will have to provide other means for giving this section water, most probably by the crection of a water tower near the new reservoir, because the surface of the water in the new reservoir is only a few feet higher than the general elevation of the land in this district.

HOW TO REMEDY THE EVIL My experience has taught me that house to house inspection amounts to nothing in reducing the waste. The only good accomplished in that manner is the discovering of leaky fixtures and the requiring of their being repaired, but it has no effect in stopping the fixtures which are left running, and this is where our great loss occurs. Under ordinary domestic pressure one-quarter of an our great loss occurs. Under ordinary domestic pressure one-quarter of an inch opening will discharge 18,432 gailons in twenty-four hours. Some idea of where the great waste occurs is revealed, when we daily see how many fixtures are left running constantly. Each year I become more and more convinced that the recommendation I made in 1886, and each year since, to place metres on all supplies, is the best and cheapest means of giving relief and that this is the only equitable way to charge for water.

THE WATER CONSUMPTION of constructing this basin the water would be taken directly from the river at a point just above the five-mile lock.

Thrown From a Buggy.

Mrs. W. H. Campbell, wife of the superintendent of public instruction of Hanover county, and her daughter. Miss Eva. met with a serious accident while driving near Hewlett's last Thursday evening. The ladies were thrown from their buggy, and Mrs. Campbell sustained some painful injuries, besties breaking one of her legs. Miss Campbell's arm was broken, and it is thought she is also suffering from internal injuries.

Dr. Herman Anderson attended the sufferers, who are now under his treatment, and will doubtless be for several weeks yet.

The Fowhatan Cinb.

At a meeting of the Executive Committee of the Powhatan Club held last night, it was determined to postpone the general meeting called for Tuesday night, April 19th, till Tuesday, April 17th. This will be the last meeting of the club before the primary election is held. At the meeting on the 17th all the candidates have been invited and are expected to have been invited and are expected to be present. The club expects a rousing gathering of the citizens on this occa-

THE CLOSING QUOTATIONS OF

Offerings and Sales at the Richmord To. bacco Exchange-Internal Revenue Collections-Foreign Advic.

NEW YORK, April 7.—The opening dealings on the Stock Exchange were without special feature, prices generally having yielded 162% per cent. under comparatively light sales. The receipt of lower cables from London was mainly responsible for the decline. After the short interest had been increased the buils took hold of the market with something like old-time vigor, and the complete change. An advance of 162 per cent. was recovered, and in many instances the highest figures of the week were recorded. The commission houses nad liberal orders both from local and out-of-town operators. The leaders in the rise were Delaware and Hudson, General Electric, Lead, Chicago Gas, Sugar, Missouri Pacific, and the Grangers. Subsequently Chicago Gas fell off 2 to 63%. Delaware and Hudson 1½ to 143, and the remainder of the list ½ to 3½ per cent. The reaction was due to sales to realize profits by the traders who bought at low prices early in the week and were unwilling to carry their contracts over Sunday. The undertone of speculation, however, was firm, and the feeling in stock circles is guite confident. The active inquiry for bonds is a conspictious feature of the dealings at the exchange, and has a strengthening influence on the market for stocks. Speculation left off firm. Railway and miscellaneous bonds were active and strong.

The sales of listed stocks to-day ag-

strons.

The sales of listed stocks to-day aggregated 119,000 shares; unlisted, 19,000 Money on call nominally I per cent.; prime mercantile paper, 3½94½ per cent. Sterling exchange firm, with actual business in bankers bills at 4874/487¼ for sixty days and 4884/4/485½ for demand; posted rates, 4884/4/485½ commercial bills, 4804/4/487 for sixty days and 4874/4/488 for demand; bar silver, 61½. Government bonds steady. State bonds dull. Railroad bonds strong. Silver at the board was neglected.

way to charge for water.

The water has been good during the past year, and as a general thing clearer than usual. I can see no reason to question the healthfulness and purity of our drinking water. Its color at certain times is the only objection, and I feel sure that this complaint would be removed by building the large storage basin recommended in former reports. In the event

The funeral took place from above residence YESTERDAY (Saturday) at 11 o'clock A. M. Interment in Oakwood.

Singed Their Wings.

A French Duchess has rulned herself at Monte Carlo lately, and her furniture, jewelry, and even her dresses have been sold. She is quite old, and has had a passion for gambling for many years. A good deal of her bric-a-brac has been bought by one of the curiosity shops in the Avenue de la Gare, where also may be seen a portrait of the Duchess as a beautiful young girl. The old lady used to be quite a fixture at the Casino.

Princess Jouriewsky (better known as Princess Dolgourouky, the morganatic Princess Jouriewsky (better known as Princess Dolgourouky, the morganatic wife of the late Czar of Russia) was robbed at the tables at Monte Cario the other day of a pocketbook containing nine thousand francs. She discovered her loss when she sat down to play, and looked considerably disconcerted for a few minutes; however, she soon recovered herself, borrowed a sum of money from a friend, and played very successfully. The Princess is very popular at Nice, and her pretty daughters are much admired; one of them bears a decided likeness to the Duchess of Winburgh when a young girl.—Nice letter in the Lady's Pictorial.

Lots of Fun,

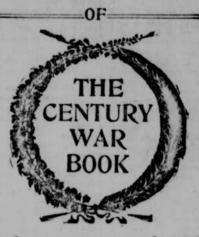

"Did you celebrate the Fourth?"
"Yes."
"Cannon-crackers and all that?"
"No. I was too hard up for that. I discharged my cook. That was fireworks enough."

PART THREE NOW READY.

"On Fame's eternal camping-ground Their silent tents are spread. And glory guards with solemn round The bivouac of the dead."

-O' Hara.

The New "People's Edition."

Brings back to the minds of old soldiers and sailors the stirring scenes enacted

> three decades ago-the exciting encounters in which they had a hand, dramas in which dread death stalked through scenes of sad sacrifice, and remorseless rapine ran rampant. And yet apart from all this crimson carnage, this melancholy miasma of wraith-wrapped war, is an undercurrent of the genuine humor of quiet camp

life, that stimulating routine of exciting memories; the exultation of victory; the dejection of defeat; good news from home; the final ending; and then peace again.

It is not a partisan book. It was written after the war, when there were no par-

FROM A WAR-TIME SKETCH.

tisans, by those who were participants on either side. Side by side with the didactic essay of doughty General is the none less valuable contribution of the puissant private; the astute Admiral and the jolly sailor boy, all

of whom tell how the battles were wonor lost; each from his particular point of view. This is history told by those who made it; and never has history been written by more knowing pens.

The followers of the Stars and Bars have equal prominence in the work with

the servers of the Stars and Stripes and the utmost good feeling is predominant hroughout. The irticles appeared first in the Century Magazine a few years ago and were

ubsequently reprinted in book form and sold at \$22 and \$28 per set. The present popular edition contains all the important papers and pictures. There is nothing lacking that could be demanded to make

this an interesting, succinct, and complete history of the greatest civil strife and reunion of modern times.

The terms upon which the public can secure this invaluable work are easy.

High wines steady at \$1.08.
